

## FINISHING & SAFETY SUPPLIES

- A. Vibrograver engraves on metal or plastic while a stroke adjuster controls cut depth & width. Also features Tungsten carbide point.
- B. Flex Shaft Kit contains the most popular machine, foot control and hand piece for the professional model maker. Includes quick disconnect flexible shaft and accessory kit with 20 different buff, mounted points, grinding wheels, burs, mounted brushes and mandrels.
- C. Zinc black and Pewter black adds an aged finish to your product, giving it life and character.
- D. Polishing wheels.

Maintaining safety is as important as any other aspect to your work. To help provide safety, Conquest offers these supplies to protect against burns and spillage.

- Foot guards protect the top side of your feet and ankles against splashing or spilling of molten alloys.
- Casting and vulcanizing high temperature gloves permit safe and easy work around furnace or in handling of hot castings.
- Apron protects against splashes of hot and molten alloys. A safety must.

With our extensive knowledge, hands on expertise and in-house lab, we can answer your questions, provide continual guidance and help solve any problems you may be experiencing. Whether you are an existing shop or a start up operation, we invite you to utilize our experience to train your employees and assist in developing new or existing items.

*Let us perfect the process for you so you can spend your valuable time making products for your customers!*
